1993. Orchard Pest Management: A Resources Book for the Pacific Northwest. Good Fruit Grower, Yakima, Washington, U.S.A.

Blommers, L., H. Helsen, and F. Vaal. Enhancing Biological Control Habitat Management to Promote Natural Enemies of Agricultural Pests. University of California Press, Los Angeles, U.S.A. Coll. Integrated Pest Management (IPM) principles are being used successfully in Pacific Northwest orchards to manage insects, mites, diseases, and other pests. These research-based techniques provide effective monitoring methods and management practices for sustained and economical control of pests, while minimizing damage to beneficial organisms. Improved health and minimal environmental impact are benefits often cited in IPM-managed orchards using reduced pesticide programs. The comprehensive reference, Orchard Pest Management: A Resource Book for the Pacific Northwest, 1993, edited by Beers, Bru
