Orchard Pest Management: A Resource Book For The Pacific Northwest

Elizabeth Beers

A fantastic book! Timothy Egan describes his journeys in the Pacific Northwest through visits to salmon fisheries, redwood forests and the manicured English gardens of Vancouver. Here is a blend of history, anthropology and politics. It includes details about and identification tips for the flora, fauna, and geology of the region. If you are looking for a simple way to discover the great outdoors, this is the perfect overview of the Pacific Northwest. Covers the Coastal and Cascade Mountain Ranges, as well as the Olympic Mountains and Coast Mountains of southern British Columbia. Describes more than 950 species of plants, animals, and mushrooms with helpful keys for easy identification. User-friendly, color coded layout. Compelling stories of insect pests in the Pacific Northwest of the United States.

Silvia I. Rondon. Insect Pests of Potato: Biology and Management provides a comprehensive source of up-to-date scientific information on the biology and management of insects attacking potato crops, with an international and expert cast of contributors providing its contents. This book presents a complete review of the scientific literature from the considerable research effort over the last 15 years, providing the necessary background information to the subject of studying the biology management of insect pests of potatoes, assessment of recent scientific advances, and a list of future research directions. This handbook is intended as a ready reference guide to the control and management tactics for the more important plant diseases in the Pacific Northwest. This book should be used by county Extension agents, consultants, field and nursery people, and chemical industry representatives. Growers, Master Gardeners, and homeowners may also find this publication useful. More about the PNW Plant Disease Management Handbook. Quick find: Hosts and diseases. Enter a few letters of a plant or disease name. Apply. Reset.
Coll. Integrated Pest Management (IPM) principles are being used successfully in Pacific Northwest orchards to manage insects, mites, diseases, and other pests. These research-based techniques provide effective monitoring methods and management practices for sustained and economical control of pests, while minimizing damage to beneficial organisms. Improved health and minimal environmental impact are benefits often cited in IPM-managed orchards using reduced pesticide programs.
