

# Curriculum Vitae

PROFESSOR MICHAEL J FIELD

September 17, 2015

ADDRESS (1): Department of Mathematics  
Imperial College  
South Kensington Campus  
London SW7 2AZ  
UK

ADDRESS (2): Department of Mathematics  
Rice University  
6100 S Main St  
Houston, TX 77005-1892  
USA

POSTAL ADDRESS: Department of Mathematics  
Imperial College  
South Kensington Campus  
London SW7 2AZ  
UK

EMAIL: [mikefield@gmail.com](mailto:mikefield@gmail.com), [Michael.Field@imperial.ac.uk](mailto:Michael.Field@imperial.ac.uk)

URL: [math.rice.edu/~mjf8](http://math.rice.edu/~mjf8), [wwwf.imperial.ac.uk/~mjfield1](http://wwwf.imperial.ac.uk/~mjfield1)

DEGREES: BSc, Univ. of Cambridge, 1967  
MA, Univ. of Cambridge, 1968  
PhD, Univ. of Warwick, 1970  
Thesis: *Equivariant Dynamical Systems*  
*Advisors:* Sir Christopher Zeeman, FRS & James Eells

*Regular positions:* Lecturer, University of Warwick, UK, September 1971 – May 1976; Lecturer, University of Sydney, Australia, May 1976 – 1985 (Sen. Lecturer from 1979); Reader, University of Sydney, January 1985–1994; Professor University of Houston, September 1992 – August 2012; Research Professor, Rice University, July 2012 – present.

*Visiting positions:* Lecturer, UNDP supported summer school on Global Analysis, ICTP, Trieste, July – August, 1972; Exchange Lecturer, Univ. Minnesota, Fall term, 1972; Visiting Lecturer,

Univ. Minnesota, Winter and Summer terms, 1973; Lecturer, UNDP supported summer school on Complex Analysis, ICTP, Trieste, June – July, 1975; Visiting Scholar, Univ. California, Berkeley, April – June, 1980; Visiting Prof. Univ. Wisconsin-Madison, 1984 – 85; SERC Research Fellow, University of Warwick, June – July, 1989; Visiting Scientist, Mathematical Sciences Institute, Cornell, August 1989 – June 1990; Visiting CNRS fellow, University of Nice, Parc Valrose, November – December, 1991; Visiting Fellow, Centre for Mathematics and its Applications, Australian National University, Canberra, ACT, June 19 – July 9, 1994; Master Class Lecturer, University of Twente, Netherlands, November – December 1995; EPSRC Visiting Fellowship, University of Guildford, UK, June 1997; EPSRC Visiting Fellowship, UMIST, UK, August, 1998; EPSRC Visiting Fellowship, Exeter, UK, October 2001–July 2002 (5 weeks in Exeter); EPSRC supported collaboration during the period August 2002 – July 2004 with Prof I Melbourne, University of Surrey; Visiting Leverhulme Professor, Imperial College London, September 2004 – July 2005; Visiting Ulam Professor, Univ. of Colorado, Boulder, Fall 2005; Gaines Scholar, University of Richmond, Virginia, Fall 2006; LMS Scheme II visitor, July 2009 (Exeter, Manchester, Warwick); Honorary Visiting Professor, Exeter University (UK), 2009 – present; Visiting Professor, University of Manchester, May 1 – 31 July, 2010.

*Awards & Honours:*

Fellow of the Institute of Physics (2004)  
 Visiting Leverhulme Professorship, Imperial College (2004–2005)  
 Visiting Ulam Professor, Boulder (2005)  
 Gaines Scholar, University of Richmond (2006)  
 Honorary Visiting Professor, Exeter University (from 2009)  
 Inaugural AMS Fellow (2012)  
 On Fulbright Specialist Roster (2013)  
 Marie Curie Fellow, Imperial College (2014–2016)

*Professional Organizations:* American Mathematical Society, London Mathematical Society, European Mathematical Society, European Society for Mathematics and Arts (ESMA).

*Editorial, Refereeing etc:* Editor of *Nonlinearity* (from 1998), *Discrete and Continuous Dynamical Systems* (2001–2010), and *Journal of Mathematics and the Arts* (from 2006). Refereeing work for a wide range of journals and institutions (including NSF Panels and publishers). Organizing Committee, SIAM, Snowbird 2009. Member of the Board of Directors of ESMA and Chair of Educational Outreach Committee.

*Recent Grants* Texas Advanced Research Program (TARP), 1/1/1994–12/31/96, ‘Pattern formation and symmetry in chaotic systems’, \$56,096 (with M Golubitsky); TARP, 1/1/96–12/31/97, ‘Symmetric patterns, symmetric dynamics’, \$66,500 (with M Golubitsky); TARP, 1/1/98–12/31/99, ‘Coupled cell systems and patterns’, \$66,500 (with M Golubitsky); NSF, 7/1/1994–6/30/96, ‘Dynamics and Symmetry’, \$213,000 (with M Golubitsky and I Melbourne); NSF, 7/1/97–6/30/00, ‘Dynamics, patterns and symmetry’, \$300,000; NSF, 7/1/00–6/30/03; (with Golubitsky, Melbourne & Török); Office of Naval Research, 2/15/94–11/15/96, ‘Dynamics, Symmetry and PDEs’, \$111,018 (with M Golubitsky and I Melbourne). EPSRC (UK) grants to support work with Dr P Ashwin (Exeter) and Prof I Melbourne (Surrey); NSF Focused research grant 5/1/03–5/31/05, ‘Synchrony and Structure in Coupled Cell Systems’, \$885,984 (with M Golubitsky, K Josic, A Török & I Stewart); NSF, 06/10/06–05/31/09, ‘Statistical and Geometric Properties of Dynamical Systems’, \$308,000 (with Matthew Nicol and Andrew Török); NSF, ‘Dynamics of Coupled Cell Systems’, 06/01/2008–11/30/2012, \$196,353; NSF, ‘Progress and Problems in Dynamics’ (workshop) (with

Török & Nicol), 04/15/12—04/14/13, \$37,000; NSF, ‘Dynamics of Asynchronous Networks, Adaptation and Visualization’, 07/15/12—06/30/15, \$286,925.

## PUBLICATIONS

### Books and Monographs

1. *Differential Calculus and its Applications*, Van Nostrand Reinhold, London, 1970. (To be reprinted by *Dover*, 2012.)
2. *Several Complex Variables and Complex Manifolds I*, London Mathematical Society Lecture Note Series in Mathematics, **65**, Cambridge University Press, 1982. (Reprinted 2011.)
3. *Several Complex Variables and Complex Manifolds II*, London Mathematical Society Lecture Note Series in Mathematics, **66**, Cambridge University Press, 1982.
4. (with M Golubitsky) *Symmetry in Chaos*, Oxford University Press, November, 1992.
5. (with M Golubitsky) *La Symétrie du Chaos*, InterEditions, 1993. (French translation of *Symmetry in Chaos*.)
6. (with M Golubitsky) *Chaotische Symmetrien*, Birkhäuser, November, 1993. (German translation of *Symmetry in Chaos*.)
7. *Symmetry breaking for compact Lie groups*, Mem. Amer. Math. Soc., **574**, 1996.
8. *Dynamics, Bifurcation and Symmetry*, Pitman Research Notes in Mathematics, **356**, 1996.
9. (with M Nicol) *Ergodic Theory of Equivariant diffeomorphisms: Markov partitions and stable ergodicity*, Mem. Amer. Math. Soc., **803**, 2004.
10. *Dynamics and Symmetry* (Imperial College Press Advanced Texts in Mathematics — Vol. 3, 2007.)
11. (with M Golubitsky) Revision and new edition of *Symmetry in Chaos* (SIAM, May 2009).
12. *Real Analysis: A senior/graduate level text on Analysis* presently under consideration by *CUP*.

### Papers

13. ‘Equivariant dynamical systems’, *Bull. Amer. Math. Soc.* **76** (1970), 1314–1318.
14. ‘A finiteness result on the ring of analytic functions defined on a Banach space’, *Studia Mathematica*, t XLXVI (1973), 17–20.
15. ‘Lectures on holomorphic function theory and complex manifolds’, *Proc. of seminar course on Global Analysis and its Applications*, IAEA, Vienna (1974), 83–134.
16. ‘Sheaf cohomology, structures on manifolds and vanishing theory’, *Proc. of seminar course on Global Analysis and its Applications*, IAEA, Vienna (1974), 167–188.

17. ‘Complex analysis on Banach spaces’, *Proc. of seminar course on Global Analysis and its Applications*, IAEA, Vienna (1974), 189–192.
18. ‘Singularity theory and equivariant dynamical systems’, *Proc. of Int. Conf. on Dynamical Systems in Mathematical Phy.*, Rennes (1975).
19. ‘Singularity theory and equivariant dynamical systems’, *Astérisque*, **40** (1976), 67–78 (revised version of preceding).
20. ‘Transversalité dans les  $G$ -variétés’, *C. R. Acad. Sc. Paris*, t. 282 (Janvier, 1976), 115–117.
21. ‘Several Complex Variables’, *Proc. of summer school on complex analysis*, IAEA, Vienna (1976), 234–253.
22. ‘Transversality in  $G$ -manifolds’, *Trans. Amer. Math. Soc.* **231** (1977), 429–450.
23. ‘Stratifications of equivariant varieties’, *Bull. Austral. Math. Soc.* **16** (1977), 279–295.
24. (With D I Cartwright). ‘A refinement of the Arithmetic mean–Geometric mean inequality’, *Proc. Amer. Math. Soc.* **71**(1) (1978), 36–38.
25. ‘Resolving actions of compact Lie groups’, *Bull. Austral. Math. Soc.* **18** (1978), 243–254.
26. ‘Equivariant dynamical systems’, *Trans. Amer. Math. Soc.* **259**(1) (1980), 185–205.
27. ‘Handlebody decompositions for  $G$ -manifolds’, *Bull. Austral. Math. Soc.* **25**(1) (1982), 29–36.
28. ‘On the structure of a class of equivariant maps’, *Bull. Austral. Math. Soc.* **26**(2) (1982), 161–180.
29. ‘Isotopy and stability of equivariant diffeomorphisms’, *Proc. London Math. Soc.* **46**(3) (1983), 487–516.
30. ‘Equivariant diffeomorphisms hyperbolic transverse to a  $G$ -action’, *J. London Math. Soc.* **27**(2) (1983), 563–576.
31. ‘Equivariant dynamics’, *Contemporary Math.* **56** (1986), 69–96.
32. (With R W Richardson). ‘Symmetry Breaking and the Maximal Isotropy Subgroup Conjecture for Reflection Groups’, *Arch. for Rational Mech. and Anal.* **105**(1) (1989), 61–94.
33. ‘Equivariant Bifurcation Theory and Symmetry Breaking’, *J. Dynamics and Diff. Eqns.* **1**(4) (1989), 369–421.
34. (With R W Richardson). ‘Symmetry breaking in equivariant bifurcation problems’, *Bull. Amer. Math. Soc.* **22**(1) (1990), 79–84.
35. (With M Golubitsky). ‘Symmetric Chaos’, *Computers in Physics* (1990), 470 – 479.
36. ‘Local structure of equivariant dynamics’, *Singularities, Bifurcations, and Dynamics*, Proceedings of Symposium on Singularity Theory and its Applications, Warwick, 1989 (eds. R. M. Roberts and I. N. Stewart), Lect. Notes in Math. **1463**, Springer-Verlag, Heidelberg (1991), 168–195.

37. (With J W Swift). ‘Stationary bifurcation to limit cycles and heteroclinic cycles’, *Nonlinearity* **4** (1991), 1001–1043.
38. (With M Golubitsky and I N Stewart). ‘Hemisphere bifurcations’, *Journal of Nonlinear Science* **1** (1991), 201–223.
39. (With R W Richardson). ‘Symmetry breaking and branching patterns in equivariant bifurcation theory I’, *Arch. Rational Mech. and Anal.* **118** (1992), 297–348.
40. (With R W Richardson). ‘Symmetry breaking and branching patterns in equivariant bifurcation theory II’, *Arch. Rational Mech. and Anal.* **120** (1992), 147–190.
41. (With M Golubitsky). ‘Symmetries on the edge of chaos’, *New Scientist* **1855** 9 January (1993), 32–35.
42. (With J W Swift). ‘Hopf bifurcation and the Hopf fibration’, *Nonlinearity* **7** (1994), 385–402.
43. ‘Determinacy and branching patterns for the equivariant Hopf bifurcation’, *Nonlinearity* **7** (1994), 403–415.
44. (With M. Golubitsky and M. Nicol). ‘A note on symmetries of invariant sets with compact group actions’, *Tatra Mountains Math. Publ.* **4** (1994), 93–104.
45. ‘Blowing-up in equivariant bifurcation theory’, in *Dynamics, Bifurcation and Symmetries: New Trends and New Tools* (P Chossat and J.-M Gambaudo, Eds) NATO ARW Series, Kluwer, Amsterdam (1994), 111–122.
46. (With P Chossat). ‘Geometric analysis of the effect of symmetry breaking perturbations on an  $O(2)$  invariant homoclinic cycle’, In: Normal forms and Homoclinic Chaos. *Fields Institute Communications* **4** (1995), 21–42.
47. (With M Golubitsky) ‘Symmetric Chaos: How and Why’, *Notices of the Amer. Math. Soc.* **42**(2) (1995), 240–244.
48. (With M Dellnitz, M Golubitsky, A Hohmann & J Ma). ‘Cycling Chaos’, *Intern. J. Bifur. & Chaos* **5**(4) (1995), 1487–1501 (also appeared in: *IEEE Trans. Circuits & Syst.* **42** (10) (1995), 821–823).
49. (With I Melbourne and M Nicol). ‘Symmetric attractors for diffeomorphisms and flows’, *Proc. London Math. Soc.* **72** (1996) 657–696.
50. ‘Geometric methods in bifurcation theory’, In: Pattern formation and symmetry breaking in PDEs. *Fields Institute Communications* **6** (1996), 181–208.
51. ‘Symmetry breaking for equivariant maps’, In: *Algebraic groups and Lie groups*, Volume in Honour of R. W. Richardson, Cambridge University Press, (1997), 219–253.
52. ‘Generators for compact Lie groups’, *Proc. AMS.* **127** (1999), 3361–3365.
53. (With W Parry). ‘Stable ergodicity of skew extensions by compact Lie groups’, *Topology*, **38**(1) (1999), 167–187.
54. (With P Ashwin). ‘Heteroclinic networks in coupled cell systems’, *Arch. Rat. Mech. & Anal.* **148** (1999), 107–143.

55. ‘Heteroclinic cycles in symmetrically coupled systems’, *Proc. IMA workshop on Pattern Formation in Continuous and Coupled Systems*, May 11-18, 1998 (eds Golubitsky, Luss, Strogatz), IMA volumes no 115, Springer-Verlag, 1999, 49-64.
56. ‘Ergodicity and robustness of symmetric attractors’, in: *Proc. Equadiff Berlin, 1999* (eds Fiedler, Groger and Sprekels), World Scientific, Vol 1 (2000), 169-174.
57. (With V Nițică) ‘Stable topological transitivity of skew and principal extensions’, *Nonlinearity*, **14** (2001), 1055–1070.
58. (With I Melbourne and A Török) ‘Decay of Correlations, Central Limit Theorems and Approximation by Brownian Motion for Compact Lie Group Extensions’, *Erg Th. & Dynam. Sys.* **23** (1) (2003), 87–110.
59. ‘Persistent Ergodicity and Stably Ergodic SRB Attractors in Equivariant Dynamics’, *Trends in Mathematics: Bifurcations, Symmetry and Patterns*, Birkhäuser, (2003), 75–86.
60. (With P Ashwin, A M Rucklidge and R Sturman) ‘Phase resetting effects for robust cycles between chaotic sets’, *Chaos* **13** (2003), 973–981.
61. ‘Combinatorial dynamics’, *Dynamical Systems* **19** (2004), 217–243.
62. (With I Melbourne and A Török) ‘Stable ergodicity for smooth compact Lie group extensions of hyperbolic basic sets’, *Erg Th. & Dynam. Sys.*, **25**(2) (2005), 517–551.
63. (With P Ashwin) ‘Product dynamics for homoclinic attractors’, *Proc. Royal Soc., ser. A*, **461** (2005), 155–177.
64. (With I Melbourne, M Nicol and A Török) ‘Statistical properties of compact group extensions of hyperbolic flows and their time one maps’, *Discrete and Continuous Dynamical Systems*, **12** (1) (2005), 79–96.
65. (With I Melbourne and A Török) ‘Stability of mixing and rapid mixing for hyperbolic flows’, *Annals of Math.* **166**(1) (2007), 269–291.
66. (With A L Alejandro-Quinones, K E Bassler, J L McCauley, M Nicol, I Timofeyev, A Török, and G Gunaratne) ‘A Theory of Fluctuations in Stock Prices’, *Physica A*, **363**(2) (2006), 383–392.
67. ‘Singularity and stratification theory applied to dynamical systems’, *Singularity Theory* (Proceedings of 2005 meeting at Luminy, eds Chéiot et al., World Scientific, 2007), 219–240.
68. (With M Aguiar, P Ashwin and A Dias) ‘Dynamics of coupled cell networks: synchrony, heteroclinic cycles and inflation’, *Journal of Nonlinear Science*, **21**(2) (2011), 271–323.
69. (With N Agarwal) ‘Dynamical equivalence of networks of coupled dynamical systems I: Asymmetric inputs’, *Nonlinearity* **23** (2010), 1245–1268.
70. (With N Agarwal) ‘Dynamical equivalence of networks of coupled dynamical systems II: general case’, *Nonlinearity*, **23** (2010), 1269–1289.
71. ‘Exponential mixing for smooth hyperbolic suspension flows’. *Regular and Chaotic Dynamics* **16**(1-2) (2011), 91-104.

72. (With N Agarwal and A Rodrigues) ‘Dynamics near the Product of Planar Heteroclinic Attractors’, *Dynamical Systems: an international journal* **26**(4) (2011), 447–481.
73. ‘Heteroclinic Networks in Homogeneous and Heterogeneous Identical Cell Systems’, *J. Non-linear Science* **25**(3) (2015), 779–813.
74. (With C Bick) ‘Asynchronous Networks and Event Driven Dynamics’, preprint 2015.

## Conference/Seminar/Workshop talks – from 1993

### Mathematics

1. ‘Blowing-up in equivariant bifurcation theory’, invited address at EBG meeting on *Dynamics, Bifurcation and Symmetries*, Cargese, September, 1993.
2. Invited talk on ‘The effect of breaking symmetry from  $O(2)$  to  $Z_2$  on a homoclinic cycle in the Armbruster-Guckenheimer-Holmes model’, Fields Institute meeting on *Normal forms and Homoclinic chaos*, November, 1993.
3. Invited series of three talks on ‘Geometric methods in bifurcation theory’, at Fields Institute meeting on *Pattern formation in PDEs*, February, 1994.
4. Invited speaker at *Sigma Xi* day on chaos, Texas A&M, May, 1994.
5. ‘Patterns in Chaos’, Invited address at inaugural *Australasian Dynamics Days*, Melbourne, Australia, 14-16 June, 1994.
6. Colloquium talk, Rice University, 1994.
7. Colloquium speaker, Mathematics Department, Australian National University, Canberra, June 30, 1994.
8. Colloquium speaker, Joint Sydney-NSW colloquium, July 1, 1994.
9. ‘Structure of symmetric attractors’, Invited address at conference on *Symmetry in Dynamical Systems*, Utah State University, September 9–11, 1994.
10. Oberwolfach, *Bifurkation und Symmetrie*, June 25 – July 1, 1995.
11. Invited speaker at workshop on *Equivariant Dynamical Systems*, ICIAM meeting July, 1995.
12. Invited speaker at Workshop on *Dynamics and Symmetry* at the Newton Institute, Cambridge 30 Oct – 3 Nov, 1995.
13. Master class lecturer on ‘Symmetry’, 13 Nov–11 Dec, 1995, Twente, Holland (series of 16 hours of lectures).
14. Principal invited speaker at Johann Bernoulli *Dynamical Systems Conference*, 11–15 December, 1995, Groningen.
15. Colloquium talk on ‘Generators for compact Lie groups’, University of Houston, November, 1996.
16. Seminar on ‘Generators for compact Lie groups’, UMIST, 1996.
17. Speaker at *Southwest Dynamical Systems* meeting, Denton, N. Texas (April 11 – 13, 1997).
18. Invited speaker at meeting on *Equivariant dynamics*, Berlin, 19 – 22 May, 1997 (three one hour talks on symmetric attractors, supported by DFG).
19. Principal speaker at Workshop on *Symmetric Chaos and Dynamical Systems*, University of Surrey, June 16–17, 1997. (Statistics on symmetric attractors.)

20. Talk on ‘Stable ergodicity’, *International Conference on Differential Equations and Dynamical Systems*, University of Waterloo, August 2, 1997.
21. Invited talk in Dynamical systems seminar at Northwestern on ‘Stable ergodicity’, October 28, 1997.
22. Colloquium talk on ‘Fubini Foiled’, University of Houston, November, 1997.
23. Invited talk in Rice Geometric analysis seminar on ‘Stable ergodicity’, January 1998.
24. Talk on ‘Stable Ergodicity’, ‘Global Analysis 30 Years Later’, Cincinnati, March 25 – 28, 1998.
25. Invited talk on ‘Heteroclinic cycles in Coupled oscillators’, in IMA workshop on Pattern Formation in Continuous and Coupled Systems, May 11 – 15, 1998.
26. Seminar on ‘Stable Ergodicity of skew extensions’, Moscow State University, June 9, 1998.
27. Principal speaker at workshop on Skew Products, UMIST, August 12, 1998.
28. Principal speaker at Workshop on Equivariant dynamics, University of Surrey, August 19, 1998.
29. Seminar on ‘Equivariant dynamics’, Cornell University, November 13, 1998.
30. Mathematics Colloquium on ‘Ergodicity’ at Claremont Colleges, April 14, 1999.
31. Speaker at May SIAM dynamical systems meeting at Snowbird, 1999.
32. Speaker and organizer at Minisymposium on Symmetry, Equadiff, Berlin, August 1-7, 1999.
33. Invited speaker on ‘Stable Ergodicity’ at DFG meeting, Weierstrass Institute, Berlin, August 7–10, 1999.
34. Seminar on *Cycling Chaos*, Boston University, November, 1999.
35. Speaker in *Geometric Analysis* seminar, Rice University, Fall, 1999.
36. Invited principal speaker, Conference on “Bifurcations, Symmetry and Patterns”, University of Porto, Porto, Portugal, 29 June – 4 July 2000.
37. Instructor at Summer School on “Bifurcations, Symmetry and Patterns”, Wednesday 5th to Friday 14th July, 2000: Complex Dynamics in Symmetric Systems.
38. Talk on ‘Dynamics on the orbit space’, AMS regional meeting on ‘Geometric and Symbolic Dynamical Systems’, October 20–22, 2000, San Francisco State University.
39. Talk on ‘Robust Ergodicity and Mixing in Equivariant Dynamics’ at Southwest Regional Workshop in Dynamical Systems, 16–19 November, 2000, University of Southern California.
40. Invited speaker on “Stable ergodicity for dynamics equivariant by a compact Lie group” at conference on *Partial Hyperbolicity* in honor of Charles Pugh’s 60th birthday, May 29 - June 2, 2001.

41. Invited speaker on “Ergodic properties of equivariant diffeomorphisms” at Prodyn meeting on ‘Statistical properties of partially hyperbolic dynamical systems’, University of Surrey, 28 August - 1st September, 2001.
42. Colloquium talk on ‘Statistics, symmetry and Skew products’, Rice University, September 13th, 2001.
43. Seminar on ‘ergodic theory of equivariant diffeomorphisms’, Trinity University, October 2nd, 2001.
44. Seminar on ‘Statistics, symmetry and skew products’, University of Exeter, UK, October 29, 2001.
45. Seminar on ‘Skew extensions’, AMS Western Sectional Meeting, Irvine, California, Nov 11-12, 2001.
46. Seminar on skew extensions, Imperial College, London, May 29, 2002.
47. Seminar on stable transitivity, workshop on piecewise isometries. Luminy, France, June, 2002.
48. Colloquium talk on ‘Statistics, symmetry and Skew products’, Texas Christian University, October 8, 2002.
49. Colloquium, Physics department, UH, February 4, 2003.
50. Colloquium, Mathematics Department, University of Porto, February 25, 2003.
51. Seminar on ‘Stable mixing for hyperbolic flows’, geometric analysis seminar, Rice University, April 9, 2003.
52. Speaker/participant at BIRS workshop on ‘Symmetry and Bifurcation in Biology’, 31 May to 5 June, 2003.
53. Seminar on ‘Stability of mixing for hyperbolic flows’, Manchester University, 14th May, 2003.
54. Speaker at minisymposium on ‘Heteroclinic cycles’, Snowbird meeting on Applications of Dynamical Systems (May 27-31 2003).
55. Speaker and minisymposium *Statistical properties of dynamical systems* organizer at 2003 ICIAM meeting in Sydney, Australia.
56. Speaker at minisymposium on *Geometric aspects of dynamics*, 2003 ICIAM meeting in Sydney, Australia.
57. Colloquium talk on ‘Randomness, Statistics and Structure in deterministic Chaos’, Mathematics Department, University of Sydney, July 11, 2003.
58. Seminar on ‘Product dynamics’, University of Porto, September 19, 2003.
59. ‘Product dynamics’, Fields Institute, December 12, 2003.
60. ‘Stability of mixing for hyperbolic flows’, Annual meeting of AMS, AMS-AWS session on hyperbolic dynamics, Phoenix, 9th January, 2004.

61. ‘Stability of rapid mixing for hyperbolic flows’, One day ergodic theory meeting, University of Surrey, March 26, 2004.
62. ‘Combinatorial Dynamics’, Imperial College, UK, March 24, 2004.
63. ‘Stability of rapid mixing for hyperbolic flows’, One day ergodic theory meeting, University of Surrey, March 26, 2004.
64. ‘Stability of rapid mixing for hyperbolic flows’, AMS sectional meeting, USC, April 3-4, 2004.
65. Colloquium talk on ‘Combinatorial Dynamics’, New Mexico State university, Las Cruces, May 6, 2004.
66. ‘Combinatorial Dynamics’, Turing Institute, UMIST, September 15, 2004.
67. ‘Stability of mixing and rapid mixing for Axiom A flows’, Recent progress in dynamics, MSRI-Clay Institute, Berkeley, Sept. 27 – Oct. 1, 2004.
68. ‘Geometry, Symmetry and Bifurcation’, Colloquium, Imperial College London, October 5, 2004.
69. ‘Stability of rapid mixing for Axiom A flows’, University of Warwick, November 2, 2004,
70. ‘Combinatorial Dynamics: Networks’, Workshop on Coupled Cell Systems, Imperial College,
71. ‘Stability of rapid mixing for Axiom A flows’, University of Exeter, November 29th, 2004. November 4, 2004,
72. ‘Heteroclinic cycles in coupled cell systems’, Coupled 60 workshop, University of Houston, February 3 – 6, 2005.
73. ‘Geometric methods in bifurcation theory’, Applications of Singularities Workshop, 7 – 11 February, 2005, Luminy, Marseille.
74. ‘Geometry, Symmetry and Dynamics’. Colloquium, University of Warwick, February 18, 2005.
75. ‘Stability of Mixing’, University of Manchester, March 2nd, 2005.
76. ‘Stability and mixing rates for hyperbolic flows’, Queen Mary College, London, March 7, 2005.
77. ‘Heteroclinic cycles in asymmetric coupled cell systems’, University of Leeds, Applied mathematics colloquium, March 14, 2005.
78. ‘Heteroclinic cycles in coupled cell systems’, University College London, March 21st, 2005.
79. ‘The Structure of Chaos’, Kempner colloquium, UCB, March 31st, 2005.
80. ‘Geometry, Symmetry and Dynamics’, Yorkshire-Durham Geometry Day, April 15, 2005.
81. ‘Heteroclinic cycles in coupled cell systems’, Applied mathematics colloquium, Bristol University, 18 April, 2005.
82. ‘Heteroclinic cycles’, DAMTP, Cambridge, 26 April, 2005.

83. ‘Heteroclinic cycles in coupled cell systems’, University of Porto, Portugal, May 8th, 2005.
84. ‘Geometric invariants for hyperbolic flows’, University of Porto, Portugal, May 10th, 2005.
85. ‘Geometry, Symmetry and Dynamics’, Colloquium, University of Southampton, June 10th, 2005.
86. ‘Geometric invariants for hyperbolic flows’, Workshop on Probabilistic Limit Laws for Dynamical Systems, Edinburgh, June 13–17, 2005.
87. ‘Heteroclinic cycles in coupled cell systems’, Applied maths seminar, University of Colorado, Boulder, September 15, 2005.
88. ‘Heteroclinic cycles and dynamics in coupled cell systems’, Newton Institute, Workshop on Theory and Applications of Coupled Cell Networks, September 30, 2005.
89. ‘Zeta functions in dynamics’, Colloquium, University of Colorado, Boulder, November 7, 2005.
90. ‘Mixing for Flows’, SFO State, AMS Sectional (45 minutes) April 29, 2006.
91. ‘Dynamics and Symmetry’, Dynamical Systems and Statistical Mechanics, Durham, 3–13 July 2006.
92. ‘Heteroclinic cycles in coupled cell systems’, Exeter Neurodynamics Meeting, 17 July, 2006, Exeter University, UK.
93. ‘Mixing’, Colloquium, University of Richmond, December 4, 2006.
94. ‘Dynamical zeta functions and mixing’, University of Southern California, April 9, 2007.
95. ‘Heteroclinic Cycles in Coupled Cell Systems’, 2007 SIAM Conference on Applications of Dynamical Systems, Snowbird, May 2007.
96. ‘Mixing for hyperbolic flows’, AMS Fall sectional meeting, De Paul University, Chicago, October 5, 2007.
97. Applied mathematics colloquium, Imperial College London, November 20th, 2007.
98. ‘Global dynamics in coupled cell systems’, Department of Mathematic Colloquium, Purdue University, February 26, 2008.
99. ‘Global Dynamics in Coupled Cell Systems’, CICADA, Manchester, UK, 28th March, 2008.
100. ‘Rates of mixing for flows’, principal speaker at Regional LMS meeting, Manchester, UK, 31st March, 2008.
101. ‘Rates of mixing for flows and skew extensions’, 1 hour talk, Rocky Mountain Conference on Dynamical Systems, May 12–16, 2008.
102. ‘Dynamical zeta functions and mixing’, joint University of New South Wales/University of Sydney Colloquium, June 2008.
103. ‘Global dynamics and combinatorics of coupled cell systems’, Dynamics seminar, University of New South Wales, June 2008.

104. ‘Global dynamics and heteroclinic cycles in coupled cell networks’, 5th European Mathematical Congress, Amsterdam, July 2008.
105. ‘Global dynamics and heteroclinic cycles in coupled cell systems’, seminar, Exeter University, July 2008.
106. ‘Resolution and intersection: three problems in equivariant geometry’, Texas Geometry and Topology Conference, February, 2009.
107. ‘Equivalence of coupled systems’, SIAM, Snowbird, May 2009.
108. ‘Dynamical equivalence of coupled dynamical systems’, Workshop on Network Dynamics, University of Exeter, July 15, 2009.
109. ‘Rates of mixing for flows and skew extensions’, ISAACS meeting, Imperial College London, July 17, 2009.
110. ‘Dynamical equivalence of coupled dynamical systems’, CICADA, University of Manchester, July 21, 2009.
111. ‘Dynamical equivalence of coupled dynamical systems’, University of Warwick, July 22, 2009.
112. ‘Mixing for flows and skew extensions’, Global Dynamics beyond Uniform Hyperbolicity, Beijing, August, 2009.
113. ‘Measuring & Seeing Chaos’, seminar, Trinity University, Texas, September 17, 2009.
114. ‘Exponential mixing for hyperbolic flows’, ergodic theory seminar, University of Warwick, 29 September, 2009.
115. ‘Dynamics & Equivalence of Coupled Dynamical Systems’, NET2009 workshop, University of Warwick, 28 September – 2 October, 2009.
116. ‘Exponential Mixing for Hyperbolic Flows’, AMS Sectional meeting, UC Riverside, November 7–8, 2009.
117. ‘Dynamics, inflation and equivalence of networks’, UC Santa Barbara, March 17, 2010.
118. ‘Dynamics, inflation and equivalence of networks of coupled dynamical systems’, Conference on Network Dynamics and Synchronization, University of Manchester U, May 15–17, 2010.
119. ‘Axiomatizing the brain: a discrete neural model with interesting properties’, University of Exeter, September 14, 2010.
120. Plenary lecture: ‘Symmetry, statistics and stochastic fluctuations’, AMS Sectional meeting, Richmond VA, 5 – 7 November, 2010.
121. ‘The nature of chaos and some models of neural dynamics’, colloquium, University of Hamburg, February 3, 2011.
122. ‘Not so trivial, trivial dynamics’, Dynamics seminar, University of Hamburg, February 4, 2011.
123. ‘A discrete neural model with interesting properties’, Networks seminar, University of Houston, April 1, 2011.

124. ‘Product Dynamics’, Dynamical Systems seminar, University of Houston, April 13, 2011.
125. ‘Asynchronous Dynamics’, Equadiff, Loughborough, August 1, 2011.
126. ‘Mixing Rates for flows’, JMM meeting, Boston, 6 January, 2012.
127. ‘Dynamics, adaptivity and asynchronous logic in large networks of coupled dynamical systems’, Workshop on Stability of Dynamical Systems, Exeter, 27 march, 2012.
128. ‘The nature of chaos and randomness in dynamics and some problems for the 21st century inspired by theoretical and computational neuroscience’, colloquium, DePaul University, April 13, 2012.
129. ‘Adaptivity and asynchronous logic in large networks of coupled hybrid dynamical systems’, seminar, Rice University, April 20, 2012.
130. ‘21<sup>st</sup> century problems; 20<sup>th</sup> century solutions: Analyticity and Averaging’, workshop on Progress & Problems in Dynamics, Houston, May 14–16, 2012.
131. ‘Heteroclinic cycles in complex systems’, 9th AIMS Conference on Dynamical Systems, Florida, July 1–5, 2012.
132. ‘Dynamics, asynchrony and adaptivity in (large) networks of discrete dynamical systems’, Dynamics Days 2012, Gothenberg, September 2 – 7, 2012.
133. ‘Asynchronous Networks’, University of Porto, September 28, 2012.
134. ‘Illuminating Chaos – Art on Average’, Colloquium, University of St Thomas, MN, October 17, 2012.
135. ‘Problems in Mathematics Inspired by Neuroscience’, University of St Thomas, MN, October 18, 2012.
136. ‘Asynchronous Networks’, University of Manchester, UK , March 2013.
137. ‘Asynchronous Networks’, Imperial College, London, March 2013.
138. ‘Asynchronous Networks’, University of Toledo, Ohio, March 2013.
139. ‘Asynchronous Networks’, Rice University, August, 2013.
140. ‘Dynamics on Asynchronous Networks’, Queen Mary, UL, September, 2013.
141. ‘Dynamics on Asynchronous Networks’, Leeds University, September, 2013.
142. ‘Asynchronous Networks: Structure and Dynamics’, Workshop on Coupled Cell Systems, University of Porto, February, 2014.
143. ‘Asynchronous Networks’, University of Warwick, January, 2015.
144. ‘Asynchronous Networks’, University of Exeter, March, 2015.
145. ‘Illuminating Chaos’, Mathematics Colloquium, Texas Southern University, March 2014.
146. ‘Realisation of heteroclinic cycles and networks’, AMS-EMS-SPM meeting Porto, 10–13 June, 2015.

- 147. ‘Asynchronous Networks & Event Driven Dynamics’, AMS-EMS-SPM meeting Porto, 10–13 June, 2015.
- 148. ‘Illuminating Chaos: Art (and Science) on Average’, public lecture, Dynamics Days, Exeter, September 2015.

### **Mathematics related**

- 149. Invited principal speaker at ‘Art-Math98 conference’, Berkeley, August, ‘Designer Chaos’. Also, presenter of Workshop at the meeting on PRISM (‘PRogram for the Interactive Study of Maps’).
- 150. Plenary lecturer on ‘Symmetry, Patterns and Designs’, Houston Teachers Institute, University of Houston, February, 1999.
- 151. Plenary speaker at Bridges Conference, Southwestern College, Kansas, July 28–August 31.
- 152. Plenary speaker at ISAMA 99 conference, June 1999, San Sebastian, Spain.
- 153. Plenary speaker at The Third Annual Bridges Conference, July 28–July 30, 2000.
- 154. Plenary speaker at University of Maubeuge (France) meeting on Maths & Arts, September 2000.
- 155. Organizer of, and speaker in, three hour symposium ‘Beauty and the Beast: Visual symbiosis of Art and Mathematics’, AAAS yearly meeting, February 15–20, 2001, San Francisco.
- 156. Organizer of workshop at The Fourth Annual Bridges Conference, July 2001.
- 157. ‘Designer Chaos’, SIGGRAPH, Los Angeles, August 12, 2001.
- 158. Panel member for forum on Art and Mathematics held at Rice University, November, 2001.
- 159. Speaker at session on ‘Mathematics and the Visual Arts’, MathFest, summer meeting of the MAA, Boulder Colorado, July 31–August 2, 2003.
- 160. ‘Illuminating Chaos’, Institut Henri Poincaré, January 22nd, 2005.
- 161. ‘Illuminating Chaos’, Institute of Education: London Knowledge Lab, London, UK, June 8th, 2005.
- 162. ‘Teacher professional development for mathematics and science in the USA: The Yale-New Haven and Houston Teachers Institutes’, Institute of Education, London, UK, July 11, 2005.
- 163. Plenary speaker, Bridges Conference, London, August 4 – 8, 2006, ‘Illuminating Chaos — Art on Average’.
- 164. Public lecture ‘Illuminating Chaos’, University of Richmond, October 11, 2006.
- 165. ‘Motivating mathematics: Why? How?’, Dana conference, UT Austin, October 27, 2006.
- 166. Inaugural meeting of ESMA, plenary talk: ‘Using mathematics in art — Using art in mathematics’, Institut Henri Poincaré, Paris, July 19, 2010.

167. ‘Using Mathematics in Art — Using art in Mathematics’, Bridges Conference, Pécs, Hungary, July 25, 2010.
168. ‘The Art & Mathematics of Chaos’, *London Knowledge Lab*, September 16, 2010.
169. ‘Visualization of complex structure’, AMS-EMS-SPM meeting Porto, 10–13 June, 2015.

## Miscellaneous

Talk to prospective students on ‘Chaos and Symmetry’ at Texas Christian University, October 8, 2002; Talk to high school students, Bideford, Exeter, May 17, 2005. Review of *Indra’s Pearls’s*, by Mumford, Series and Wright, for *Science*. (March 7, 2003). Review of *Images of a Complex World. The Art and Poetry of Chaos*, by Robin Chapman and Julien Clinton Sprott, Jr. *Math & the Arts* **2**(4) (2008), 208–211. Review of ‘A Gallery of Chua Attractors’, WSC, 2007, *Jnr. Math & the Arts* **4**(1) 2010, 49–51; Review of ‘Beauty of Fractals: Six Different Views, by Denny Gulick and Jon Scott, Editors’, *Jnr. Math & the Arts*, **6**(1) (2012), 56–58.

## Graduate teaching

A wide range of courses including *Elliptic & Pseudodifferential Operators* (Sydney), *Representation theory of finite and compact Lie groups* (Warwick & Houston), *Differential manifolds and topology* (Sydney & Houston), *Ergodic Theory* (Houston), *Several complex variables* (Sydney & Houston), *de Rham theory, sheaf cohomology* (Houston), *Statistical properties of dynamical systems* (Houston), *Networks* (Houston). Recent seminar courses on *networks* and *heteroclinic networks and cycles* (Houston) and many Masters tutorials and undergraduate honours projects (Sydney & Houston).

## Outreach and other activities

### Houston Teachers Institute

I had been very involved with the *Houston Teachers Institute* (HTI) from its inception in 1998 to 2009 when the association with the Yale National Initiative ceased. I was co-chair of the University Faculty Advisory Council until Fall 2009. I was also a member of the National University Advisory Council of the Yale National Initiative. Over the past 10 years, I have been actively involved in and chaired many meetings hosted by the Yale-Newhaven Teachers Institute at Yale. The Houston Teachers Institute was based on the successful Yale-New Haven teachers institute model and gave innovative semester long seminars to teachers in the local school district (HISD).

I led three seminars in 1999, 2001 and 2004. The 1999 seminar, which was in the general area of symmetry, patterns and designs, ran two hours/week over the Spring semester and into summer. The ten teachers enrolled in the seminar produced curriculum units in the general area of symmetry, patterns and designs (see the URL: [hti.math.uh.edu/](http://hti.math.uh.edu/) for more details.) The curriculum units produced by the teachers were published and are accessible on the web (they are still available at <http://hti.math.uh.edu/>). The 2001 seminar was on statistics and probability (‘Figuring the Odds: Learning to Live with Life’s Uncertainty’). There were 11 HISD teachers in the seminar and the curriculum units produced by the teachers have been published, and are accessible on the web. The 2004 seminar was in the area of geometry (‘Hands on Geometry: How we can use geometry to see the world around us’.) There were 12 HISD teachers in the seminar (just under 40 applied — the most heavily subscribed seminar in the history of HTI).

## Computer art based on geometry and dynamics

My work has been shown in a number of exhibitions including:

*Ars (Dis)Symmetrica '99* exhibition, part of UNESCO-ICSU World Conference on Science, Budapest, June 26–July 1, 1999; *The Frontier between Art and Science* international exhibition, 1999–2001. Spain: Valladolid, March 1–15; Salamanca, April 6–23; León, April 26–May 14; Granada, June 26–July 7. Belgrade, Sep 29–Oct 6; Vienna, Oct 9–13; Anglet, France, 8–17 Dec.; Special exhibit as part of the Fractal Alhambra project, Granada, June 26–July 7; *8th Digital Salon*, School of Visual Arts, New York, Nov 6–Dec 9, 2000; International tour 2001: Madrid, Jan 19–Feb 6; Dijon, Feb 15–March 19; Valladolid, May 8–May 30; Malaga, July 25–September 15; *Art & Math 2000*, Cooper Union, New York, Nov 7–Dec 15, 2000; *Art & Math 2001*, Berkshire College, Pittsfield, Mass., Feb 1–Mar 30, 2001; “*Math=Art*”, Kingwood College, Texas, Nov 2–Nov 22, 2000; *Art Gallery: N-Space*, August 12–August 17, Los Angeles, SIGGRAPH, 2001; *Digital Salon: Selected works*, Corning Gallery, New York, July 11–Sep 8, 2001; *ACM/SIGGRAPH Travelling art show 2001*, 2001–2003, Cape Town, Afrigraph conference, 4–7 Nov, 2001; Rocky Mountains December; Detroit January 2002; *Art: The Visual Messenger*, Kingwood College, October, 2001; *9th Digital Salon*, School of Visual Arts, New York City, Dec 17, 2001–Jan 16, 2002; *Celebrating the Human Drive for Community Through Art*, Kingwood College, December 2001 - January 2002; *Midwest Computer Art Exhibition*, University of Saint Francis, Fort Wayne, Indiana, Feb 2–Mar 8, 2002; *MathArt-ArtMath*, Selby Gallery, Ringling School of Art and Design, February–March 2002; *Bridges: Mathematical Connections in Visual Art*, Towson University’s Holtzman Art Gallery, July 13 to August 10, 2002; *Rhythm and Structure*, Fire Patrol No.5 Gallery, January 2003, New York; *Art Gallery*, July 27–July 31, 2003, San Diego, SIGGRAPH 2003 (3 pieces); *ACM/SIGGRAPH Travelling art show 2003*, 2003–2005; Mathematical art exhibit, Annual meeting AMS, Phoenix, Arizona, January 2004; Mathematical art exhibit, Annual meeting AMS, Atlanta, Georgia, January 2005; Mathematical art exhibit, Institute Henri Poincaré, 2005 & 2010; Mathematical art exhibit, Bridges, London 2006 & Pécs, 2010; Mathematical art exhibit, Annual meeting AMS, San Diego, California, January 2008; Component of the *Cartesian MathArt Hive* organized by John Sims, held at Bowery Petry Club, NY, NY; Mathematical art permanent exhibits: Fields Institute, Canada; University of Warwick; University of Waterloo, Canada; London Knowledge Lab; University of Manchester. Numerous frontispieces including the 2009 AMS book *Mathematics Under the Microscope* by Alexandre Borovik (Manchester).
