Principles and Characteristics of Communicative Test Design Principles. Communicative language tests are used with the goal of measuring language learners' ability to take part in acts of communication or to use language in real life situations. Communicative tests, which cover the four language skills of listening, speaking, reading, and writing, are designed on the basis of communicative competence. "Working on washback" is the fourth principle of communicative language testing. In order to obtain positive washback, test writers should create clear scoring criteria that will be provided to both teachers and test takers. Course objectives and test content are also put into consideration in the hope of promoting positive washback. When testing follows the principles given below, the creative element of test design and execution rivals any of the preceding software development steps.

1. Testing shows the presence of bugs. Testing an application can only reveal that one or more defects exist in the application, however, testing alone cannot prove that the application is error free. Therefore, it is important to design test cases which find as many defects as possible.
2. Exhaustive testing is impossible. Unless the application under test (AUT) has a very simple logical structure and limited input, it is not possible to te...

Testing Principles By Didi Sukyadi English Education Department Indonesia University of Education Practicality • • • Is not excessively expensive Stays within appropriate time constraints Is relatively easy to administer Has a scoring/evaluation procedure that is specific and time efficient items can be replicated in terms of resources needed e.g. time, materials, people can be administered can be graded results can be interpreted Reliability • A reliable test is consistent and dependable. • A scoring procedure should be worked out in advance in regard to the categories of language that will be rated. • The scoring procedure should be clearly defined in terms of what each scores within each category means. •
