Flora of Eastern Saudi Arabia. Plants of South-Western Morocco. Pictures from Qatar (Flickr/cpmkutty). Pictures from Qatar (Panoramio/safamarwa). Pictures from Oman. Flora of Israel. How the web page was created. A list of plants with their common names was written using online sources and books. Web pages were written by a program consisting of several scripts. Full names, synonyms, and classification of plants were found online from catalogueoflife.org and theplantlist.org using a script. Pictures of plants were selected from a database using a script. This web page was written using a scrip The wildlife of Saudi Arabia is substantial and varied. Saudi Arabia is a very large country forming the bulk of the Arabian Peninsula. It has several geographic regions, each with a diversity of plants and animals adapted to their own particular habitats. As well as high mountains and deserts, there is a coastal plain and long coastline on the Gulf of Aqaba and the Red Sea to the west and a rather shorter coastline on the Persian Gulf to the east.
