Previous The International Encyclopedia of the Social & Behavioral Sciences, originally edited by Neil J. Smelser and Paul B. Baltes, is a 26-volume work published by Elsevier. It has some 4,000 signed articles (commissioned by around 50 subject editors), and includes 150 biographical entries, 122,400 entries, and an extensive hierarchical subject index. It is also available in online editions. Contemporary Psychology described the work as "the largest corpus of knowledge about the social and behavioral

In total, 24 variables, comprising 13 behavioural characteristics and 11 personality traits, were extracted from the four foundational typologies and used to construct a 488-item questionnaire delivered online to 160 self-identified victims of interpersonal violence. A Principal Component Analysis was performed on those variables and a psychological typology was developed. Tests of association were conducted on the crime categories and the types yielded in the typology. The final step comprising a comparison between the victim typology and the previous ones then guided the refinement of the el Encyclopedia of statistics in behavioral science. 1. ed.
