The educational imagination: On the design and evaluation of school programs. New York: Macmillan.) Do you want to read the rest of this article? Utilizes Dewey's ideas on the relationship between art and educational research to increase understanding and the creation and presentation of educational research in conjunction with art, discussing Eisner's and Barone's work to promote arts-based educational research. The article defines arts-based educational research, identifies its limitations, proposes an adventurous option, and discusses the importance of research and art in education. (SM). [View](#).
